LATEST TECHNOLOGY AND INNOVATION BEING PRACTISED IN HR

We are excited to share a major enhancement in our payroll process with the introduction of automation. Since May 2023, we have been integrating attendance records with our payroll vendor. As of February 2024, this process has become fully automated and is synced with our payroll vendor on the cut-off date through API integration.

This integration ensures precision and timeliness in payroll calculations, significantly eliminating manual errors and reducing administrative effort.

The automation not only smoothens the process but also enhances overall efficiency, allowing us to focus more on strategic initiatives. By adopting this technology, we reinforce our commitment to innovation and continuous improvement, providing a seamless experience for our employees and optimizing our internal operations.

My journey with Minosha India Ltd has been incredible so far. I feel grateful to be the part of this company. I was excited and quite nervous at the beginning as it was my first-ever corporate job.
